Founder Message

As a responsible human being I observe differences done between male and female in our own families, sexual violence against women are heard on daily basis, untouchability is still continuing, child labor is a nightmare widely practiced, Global warming , Pollution etc. Therefore there is a lot about this country to be changed. This is only possible when people will change their own mind setup and come forward with new views, ideas, and dreams. And for this education should be made very important and compulsory for every people.

After watching all these things I realize and decide that we organize a poster competition and try spread some social issue for awareness to the world. These are various ways we can avoid the social issues of the country and make it a developing country only if all the citizens of the country help each other in every prospect without making any issues.
